LANDSCAPE SERVICE

GET IN TOUCH WITH US FOR HELP WITH ANY OF YOUR LANDSCAPE PROBLEMS!

The term "landscape service" often means nothing more than the planting out of a few items of nursery stock sold to customers who are unable to do this for themselves. However, in the case here, it means everything that the term should mean. Planning of your grounds by an expert of many years' experience. For 18 years Mr. Holmes has been in the landscape business—eight of these years having been spent with the University of Wisconsin as Assistant Professor of Horticulture and Landscape Extension Specialist. Planning your grounds includes suggestions for grading and lawn making, location and kinds of driveways and walks, as well as the arrangement of plantings that will best enhance the appearance of your home. Estimates will be prepared for you as to actual cost of each step in the development of the plan and the Red Wing Nursery will undertake the entire job or as much of the job as you may desire.

EARLY ORDER DISCOUNTS

To encourage early orders, we offer the following discounts for cash with order:

On all orders of \$2.50 or more received by March 15 deduct 10%

On all orders of \$2.50 or more received after March 15 and before April 1 deduct 5%

To help us conserve wrapping materials, combine your order with a neighbor's whenever it is possible. Each order will be tied up separately so that no mix-up can occur, but all orders will be packed for shipping in a bale or bundle. It will save on the freight or express.

Group orders of two or more may take an additional 2% discount.

Grow Your Own Fruit--Plant an Orchard This Spring!

The Best of Hardy

FRUIT TREES

APPLES

2 YEAR — TRUE TO NAME

SUMMER

DUCHESSE—Not a new variety, but as yet not replaced by any of the newer varieties. Fruit is large, greenish yellow, striped with red.

BEACON—A new fall apple of fine appearance and quality. Ripens shortly after the Duchess and keeps for some little time. This is an early bearing variety of deep red fruit, covered with minute white spots. It is a good home orchard apple and an excellent one for the commercial grower as well.

MELBA—A new variety suggested to take the place of the Yellow Transparent. Not quite as early, but far superior. A yellowish green apple with a red blush. Tree is blight resistant.

MILTON—Hardy and vigorous tree. A cross between Transparent and McIntosh. Ripens in Wealthy season. Fruit pinkish red, of good flavor and quality.

FALL

WEALTHY—The old standby and a heavy producer of large deep red fine quality fruit. Its one fault is its susceptibility to fire-blight.

CORTLAND—A recent introduction resembling the McIntosh, though somewhat harder and a little later. Good red color and fine eating and dessert apple.

VICTORY—This is the latest Minnesota Plant Breeding Farm introduction, just named this year (Minn. No. 396). This is another McIntosh type, hangs on the tree better, keeps longer, is more resistant to scab, and is a more consistent annual bearer. Is of fine quality and good for both eating and cooking. Fruit is of a rich medium red color.

WINTER

HARALSON—The Northwest's leading winter apple. Very hardy, sturdy tree, annual bearer, early bearer, large fruit, well colored, and one of the best keepers. A wonderful cooking apple and thought by some to be equal to most as a dessert apple.

MINJON—Minnesota's No. 700 which was named last year. An apple that takes the place of the Jonathan for the Northwest. Has fine quality, deep red color, keeps well and is thoroughly hardy. Should be planted in every home orchard.

FIRESIDE—This year's introduction by the Minnesota Fruit Breeding Farm (Minn. No. 993). It has the highest quality of all the Minnesota introductions and rated by many as better than Delicious or any other standard variety. The tree is large and vigorous; fruit is large and bright colored, about half red over a greenish yellow ground. An annual bearer of fine keeping fruit.

PRAIRIE SPY—Another Minnesota apple of rather recent introduction. A good grower, splendid producer, very hardy and fruit is large and well colored. Keeps well and is of fine quality. Especially fine as a baking and cooking apple.

CRABS

DOLGA—A sturdy grower, free from blight and bears heavily. Fruit is good sized, brilliant red, and excellent for jelly making.

LATHAM—This year's introduction by the Minnesota Fruit Breeding Farm (Minn. No. 240). A crab of unsurpassed quality, large sized, fine color and excellent for both jelly and pickling.

WHITNEY—The universal favorite. Sturdy, rapid and upright grower. Large, well colored and sweet fruit.

3 to 4 ft. 4 to 5 ft. 5 to 6 ft.
50¢ 75¢ \$1.00

6 trees for the price of 5
12 trees for the price of 10

ADDITIONAL VARIETIES OF APPLES

The above list is only a partial one, as we have a most complete line of apples. Write us concerning other varieties that you may be interested in. Anyone interested in making rather large plantings for commercial or semi-commercial use is invited to write concerning special prices on large numbers of trees.

HARDY

APRICOTS

Hardy Manchurian Apricots can now be offered with every expectation of success. Fruit is of good size and of excellent quality. Makes excellent jam and is fine for canning. Trees have stood extremely low winter temperatures. We offer just two varieties—the ones which seem to have proven the best in this area.

SCOUT and MANCHU

3 to 4 ft. 4 to 5 ft.
\$1.00 \$1.50
3 for \$2.75 3 for \$4.25

PEARS

BANTAM—Latest introduction by the Minnesota Plant Breeding Farm (Minn. No. 3). A medium sized pear, early to ripen and very hardy. Fruit is of high quality, excellent for eating and for canning.

MENDEL—The old standby for the Northwest. Blight resistant. Large fruit, good quality, sweet and juicy. Keeps well throughout the fall.

PARKER—Originated at the Minnesota Plant Breeding Farm and considered having the finest quality of all. Large sized fruit, golden yellow with deep pink blush, ripening late in August.

PATTEN—A strong and vigorous grower, free from blight and the hardest of all the pears suitable for the Northwest. Good sized fruit, very tender, juicy and wonderful tasting. Ripens in September.

3 to 4 ft. 4 to 5 ft.

75¢ \$1.50
3 for \$2.75 3 for \$4.25

PLUMS

EMBER—Color reddish yellow, hangs well on the tree and is an exceptionally long keeper. It is a late plum, large sized and high in quality.

PIPESTONE—A new Minnesota introduction. A very large red plum of good quality which ripens early.

RED COAT—Another new Minnesota Plant Breeding Farm introduction. A very productive, good sized red plum. Ripens late in August and is excellent for canning.

SUPERIOR—An excellent plum for the home garden. Not as heavy producer as some, but high in quality and very large in size.

UNDERWOOD—A large fruited, early ripening plum of outstanding quality. An annual and heavy bearer, making it the most desirable in all plum plantings.

4 to 5 ft. 5 to 6 ft.

75¢ \$1.00
6 for \$4.00 6 for \$5.25

NOTE—With all plum plantings be sure to include one or more of recognized pollinating qualities. Successful plum production depends upon this adequate cross pollination. The most satisfactory varieties are:

GOFF, SURPRISE, KAGA, DeSOTA, TOKA
(All Plums Same as Priced Above)

CHERRIES

The growing of sour cherries in the Northwestern area is not an entire success. Only where the trees can be given an ideal setting will they do well enough to repay for their care. We do, however, offer the common varieties:

EARLY RICHMOND—Medium sized, dark red, juicy. Very productive. Earliest of the sour cherries.

ENGLISH MORELLO—Latest of the sour cherries. Medium sized fruit, meaty flesh, medium dark red.

MONTMORENCY—Large red fruit; tender, mildly acid. Possibly the best of the sour cherries for this area.

3 to 4 ft. 4 to 5 ft.

\$1.00 \$1.25

Cherry Plums

The hybrid Minnesota cherries or cherry-plums are the answer in the Northwest to the cherry situation. Perfectly hardy and productive, they give us plenty of delicious fruit for canning and eating from hand.

OKA—Immense productive, bearing a year after setting. Fruit deep purple, good sized and delicious. Tree very hardy and rather dwarf in growing habit.

SAPA—An early medium to large fruiting hybrid, excellent for canning. Trees bear young and regularly.

OPATA—Immense crops of medium sized, good quality fruit. Earliest of all the cherry hybrids to ripen. Hardy trees, rather dwarf in growth.

COMPASS—Not a hybrid, but a fine substitute for the sour cherries. Very hardy and especially fine for preserving and canning.

4 to 5 ft.

75¢ 6 for \$4.25
12 for \$8.00

HOME-GROWN BERRIES

Fresh From Your Own Garden!

RASPBERRIES

CHIEF—An early red of fine quality. Large fruit that ripens 10 days ahead of the well known Latham. Plants disease resistant.

LATHAM—The most popular red raspberry in the country. Hardy, productive and profitable. Unsurpassed for home garden and commercial plantings.

NEWBURGH—A new red raspberry that is rapidly winning favor wherever it is planted. Fruit of highest quality. Plants very productive.

25 for \$1.00
100 for \$4.00

CUMBERLAND—The standard of the black raspberries. Fruit medium size and of fine flavor.

LOGAN—A new black raspberry of outstanding quality. It is somewhat earlier than the Cumberland and is disease resistant.

25 for \$1.50
100 for \$5.50

THE LATEST THING! . . . GROW

BLUEBERRIES

It is possible to grow blueberries in this area without much extra care. We offer two varieties.

RANCOCUS—An early variety of good quality.

RUBEL—A little later than the Rancocus and possibly a better quality fruit.

1 Yr. Rooted Cuttings, ea. 35¢
2 Yr., 12 to 18 inches . . . 75¢

BLACKBERRIES

ALFRED—The coreless blackberry. A strong grower and a heavy bearer. Berries large, sweet and delicious.

25 for \$1.50
50 for \$2.75

ASPARAGUS

WASHINGTON—A strain of rust resistant asparagus. A heavy yielder of thick and heavy shoots with wonderful flavor.

25 for 85¢ 100 for \$3.00

CURRANTS

PERFECTION—A wonderful currant for jelly. Large red clusters of fruit and a heavy producer.

RED LAKE—A new variety of highest merit. Very large berries in long, well filled bunches. Bushes are thrifty and very productive.

30¢ each 5 for \$1.25

GOOSEBERRIES

CARRIE—Very large berries of excellent flavor, produced in great quantity on sturdy, hardy bushes.

PIXWELL—A new variety of extremely large berries, produced in abundance. Easier to pick than other gooseberries because of long stems and fewer thorns.

35¢ each 3 for \$1.00

RHUBARB

McDONALD—A fine flavored rhubarb unusually high in sugar content. A new and excellent variety.

35¢ each 3 for \$1.00

GRAPEVINES

BETA—The most widely grown and best known grape in the Northwest. A heavy annual bearer of medium sized fruit of good quality for juice and jelly.

CONCORD—A very popular and profitable commercial variety. Not quite so hardy as the Beta. Has large bunches of good sized fruit of good quality.

FREDONIA—A new and very fine grape. It is three weeks earlier than Concord, a very heavy producer and vigorous grower. Bunches are compact and have the finest flavor of all the black grapes.

25¢ each 2 for 45¢
10 for \$2.00

NEW MINNESOTA GRAPES—Available in black, red and white. Not named as yet and supply limited. All are very hardy and of excellent quality. Order by color wanted.

45¢ each

Strawberry Plants

SENATOR DUNLOP—An old variety, but still one of the best. Berries of medium size, red clear through, and of good quality.

PREMIER—The most widely planted early commercial strawberry. Tremendously productive, of fine quality fruit. Does well on most any type of soil and repays fertilization with immense crops.

25 for 75¢ 100 for \$2.50
500 for \$10.00

GEM—The best everbearing strawberry for most soils. Bears within 60 days after planting. Large, sweet fruit.

25 for 95¢ 100 for \$3.50
500 for \$15.00

BURGUNDY (No. 1192)—A new berry from the Minnesota Fruit Breeding Farm. Ripens late, with bright colored fruit of good quality. Must be planted with some stawberry for cross pollination.

25 for \$1.15 100 for \$4.00

MAIL ORDERS

We are offering this catalogue this year in the hope that it will help solve one of the problems that we are all faced with—lack of transportation. It is not possible for us to call on all the home owners that we would like to. It is not going to be possible for everyone to visit our nursery who might wish to. For that reason, we are hoping that we can serve you through the mails. We assure you of prompt attention and that your orders will be filled with first class stock only. Use the enclosed order blank and please give us all the information necessary as to how and when to ship. Notice our offer on the other side of this page for early order discounts.
